

## OUR FURNITURES

The furnitures of class 2019 at Produkt Development with Furniture Design at School of Engineering at Jönköping University.

### ASK

Robert Germundsson  
Ida Greverius  
Jakob Johansson  
Vanessa Ch. Larsson

### SEMI

Josefine Johansson  
Rebecka Lindbom  
Stina Lindstam

### X&Y

Morgan Engkvist  
Anneli Gustavsson  
Lisa Karlsson  
Merima Sjerotanovic  
Angelo Taneo

### OMGE

Zelga Kabrial  
Nathalie Milde  
Julia Pettersson  
Andreas Smedberg  
Cecilia Viktorsson

### HEIMDALL

Marie Jarnefjord  
Malin Persson  
Therese Olefors

### VITTNE

Kajsa Dahlbäck  
Amanda Hägerstrand  
David Klasson  
Julia Larsson  
Lina Spåls

### ÅSYN

Emelie Gustafsson  
Sandra Kjellman  
Evelina Larsson  
Linda Ström

# TALK ABOUT IT.

Within design we talk a lot about needs. How do we meet needs, and for whom? How do we feel included or excluded?

## TALK ABOUT IT.

We want to create a dialogue about discrimination, equality, needs, accessibility and equal treatment.

Within design we talk a lot about needs. How do we meet needs, and for whom? How do we feel included or excluded?

The students have created seven strong stories, each analyzing and reflecting on different needs, and on different grounds for discrimination. The stories have been used as inspiration and are conveyed, directly or indirectly, through the furniture shown here.

The aim of the project has been to create furniture that is beautiful, innovative and functional, but also convey something more. We want to pay attention to a topic that we think is important. We want to open up for dialogue and bring up thoughts.

Göte och Linnéa Öhrskog Foundation administers the scholarship fund and shall through annually scholarships support, stimulate and develop necessitous, merited and creative students at Träcentrum orientated towards wood and furniture business.

This student project have been financially supported by the Göte och Linnéa Öhrskog Foundation. The students involved want to address great gratitude towards the foundation.

## PRODUCT DEVELOPMENT WITH FURNITURE DESIGN

This program prepares the students for becoming design orientated product developers with high competence within the furniture and interior business.

The students will get a holistic view on the design process, profound knowledge about furniture construction, 3D-modeling and sustainable design.

During the education the students work with every step in the design process as creativity, sketches, CAD, prototype making and presentation. Visualising furniture and interior and designing marketing materials are other things the students will learn how to do.

Träcentrum in Nässjö operates the program on behalf of School of Engineering at Jönköping University
